

## **The Bell Rings for Everyone**

The Bell Rings for Everyone organises and creates opportunities for the inclusion of disabled children in public schools. Physically and mentally disabled students attend class several times a week, where they participate in supervised activities. Inclusion means making social interaction easier for the disabled students, fostering a sense of understanding among the non-disabled students, and giving schools access to special needs educators. Currently based in many different cities in Hungary, The Bell Rings for Everyone hopes to bring inclusion to schools throughout Europe.
