Ecuador: Earthquake 2015
EIB employees donation
The main responsibility of the mission was to assist the Ecuador operation as a Shelter specialist based in Pedernales:

1. Update the IFRC shelter strategy according to the situation in the field, with assessments, data collection and other that are managed by the Ecuadorian Red Cross.

2. Organize and managing the distributions, material purchase, team coordination and other field activities to support the project in collaboration with the local coordinator of the Ecuadorian Red Cross in the field.

3. Proposition and design of an alternative “evolutive shelter” model to be used by the IFRC in the future steps of this operation.

4. Support the Ecuadorian Red Cross on representation with the local authorities as a IFRC delegate in the field.
