

### **Key Evaluation Criteria**

All submissions must comply with all the rules listed on the [Rules page](#) and commit to use potential awards for the purpose of their proposal.

Key evaluation criteria for the 1<sup>st</sup> round selection include the relative significance of the problem targeted, the sustainability of the innovation proposed and the estimated social impact of the proposed solution.

2nd round assessment will take account of the likelihood for implementation based on the scope of the proposal's social vision and its overall cost effectiveness as well as the team's commitment, strategy and implementation capacity.

Applicants selected for the 2<sup>nd</sup> round will be invited to a two-day mentoring workshop, to be held during the month of July (dates and venue to be announced at a later stage), after which they will be allowed to fine-tune/complete their ideas in view of their final presentation. The application material should be submitted in full no later than 15 September (with the new elements properly identified).
