

The DO School

Based in Germany, the DO School offers education that creates real impact. It teaches social innovation and entrepreneurship hands-on, empowering the next generation of change makers and creating effective solutions to real-life challenges faced by leading organisations. Its one-year programmes for talented social entrepreneurs from around the world lead the participants from idea to action. Each Fellow starts his or her own venture during this time. With several thousand applications a year the DO School is expanding its programmes to various cities in Europe and America as well as online.
