On October 4th 2016, category 4 hurricane Matthew has hit Haiti bringing 145mph winds, heavy rain and dangerous storm surges.
"It’s complete destruction in Jérémie, the capital of the Southern department of Grande Anse. About 80 percent of the buildings are gone. All phone lines and electricity are down. Access is completely cut off, and everyone is running out of food and money. The bank is offline. There’s already been three cases of cholera in the hospital, but there is no electricity or generator. CARE has 16 staff there at this moment and we are trying to maintain regular contact, but it is proving very difficult."

Jean-Michel Vigreux, CARE Country Director in Haiti
Day -2: CARE’s first response
Day 1

After Hurricane, CARE’s emergency response teams provided food, water, shelter and health care.
Day 1-30: CARE’s first response

CARE distributed bottled water, water purification tablets, hygiene kits and hygiene kits for cholera prevention.
Day 1-30: CARE’s first response

CARE distributed plastic tarps, blankets, mattresses and shelter kits.
Day 10-100: CARE’s response

Temporary learning centers, child-friendly spaces, psychosocial support, Water and Sanitation in schools and repairs.
EIB and CARE: Your action and your impact

With the donation from EIB and its staff, CARE could support the very first distributions.

To contain the threat of a massive colera-outbreak:
• 72,200 aquatabs where distributed to most vulnerable families

To allow families to be somehow protected during the first weeks after the hurricane:
• 100 tarps have been distributed

Care®
Die mit dem CARE-Paket.
Thank you!!
