The EIB Institute (EIBI) was set up within the EIB Group (European Investment Bank and European Investment Fund) to promote and support academic, cultural and social initiatives with European stakeholders and the public at large. It is a key pillar of the EIB Group's community and citizen engagement. The EIB Institute's Knowledge Programme channels support to higher education and research activities in the EU mainly through university chairs, grants, sponsorships, courses and the organisation of the EIB Summer School. It fosters higher education through cooperation agreements with universities and research centres across Europe.

UNIVERSITY CHAIRS

Climate change is one of the greatest global challenges of our time. Immediate and coordinated action is crucial to overcome its effects. The EIB, as the EU's climate bank, has made climate action one of its top priorities and today is one of the largest multilateral providers of climate finance worldwide.

To promote knowledge transmission, support academic research and share expertise on climate related issues, the EIB is supporting the EIB Chair on climate change policy and international carbon markets at the European University Institute, and the Sciences Po Chair for sustainable development and climate transition.

Emma Navarro

Former EIB Vice-President responsible for Climate

“By supporting this chair we aim to foster research, awareness and debate on topics that are key to shape a sustainable future for all.”

Renaud Dehousse

President EUI

“The EIB Climate Chair will promote the transmission of best climate policy practices across the world through research, teaching, and dissemination of efforts.”

THE EIB SUPPORTS THE CHAIR ON CLIMATE CHANGE POLICY AND INTERNATIONAL CARBON MARKETS (“EIB CLIMATE CHAIR”) AT THE EUROPEAN UNIVERSITY INSTITUTE IN FLORENCE.

Held by Prof. Jos Delbeke and set within the School of Transnational Governance, it will connect the EUI’s research and training with the EIB’s expertise in both financial and non-financial aspects of climate interventions, for example through the organisation of joint scientific events.

Supported by a Scientific Committee, Prof. Delbeke will work alongside researchers at different stages of their careers, carrying out research on carbon markets and sustainable finance, sustainable energy and industrial transition, as well as on the assessment of policies and regulations.

Jos Delbeke

Chair, EIB Chair on Climate Change Policy and International Carbon Markets

THE EIB CO-SPONSORS THE SCIENCES PO EUROPEAN CHAIR FOR SUSTAINABLE DEVELOPMENT AND CLIMATE TRANSITION.

Held by Prof. Shivsharan Someshwar and set within the Paris School of International Affairs and the School of Public Affairs it will, over the next three years, seek to develop integrative thinking to help resolve complex challenges of sustainable development and climate transition.

It builds upon the academic excellence of Sciences Po with its global network of partner universities to promote academic dialogue and make recommendations to current and future policy makers all over the world.

Werner Hoyer EIB President

It is supported by a Scientific Committee which will determine the strategic orientation of research, training, education, and outreach activities annually. Current external members of the Scientific Committee include Prof. Jeffrey Sachs (USA), Prof. Laurence Tubiana (France), Julia Marton-Lefèvre (France), Sunita Narain (India), and Prof. Rizaldi Boer (Indonesia).

The Chair is co-sponsored by the EIB, Hermès, the luxury goods manufacturer, and HSBC.

STAREBEI

RESEARCH GRANTS

STAREBEI (STAgEs de REcherche BEI-EIB research internships) is a programme that provides grants to universities to finance junior researchers carrying out research projects proposed by the EIB Group under the joint supervision of a university tutor and an EIB Group staff co-tutor. The research topics are decided by the EIB Group in accordance with its interests and needs. Universities are directly contacted by the EIBI and cannot propose topics.

EXAMPLES OF STAREBEI RESEARCH GRANTS

UNIVERSITIES	THEME	YEAR	COUNTRY	EIB PRIORITY
The Bucharest University of Economic Studies (ASE)	Sustainable paths of just transition for the coal regions in Romania	2020	RO	Climate & Sustainability
University of Zagreb	Prediction of cashflows timing and patterns in international bank accounts	2020	HR	Finance

University of London - SOAS	How to make energy efficiency projects attractive? An analysis of EU firms	2018	UK	Energy market

**64 young researchers from
41 universities in 14 countries have benefited
from 59 STAREBEI research grants**

TESTIMONIALS:

Antonio Bonatesta

European University Institute

“The STAREBEI programme was a great opportunity to broaden my horizons, to improve my skills, to acquire new intellectual methods and ‘habits’ towards doing academic research, to think of myself as a complete and independent researcher. The day I presented my research results in Luxembourg, among the EIB executives and employees, was one of the most exciting in my career to date!”

Pauline Ravillard

University of London – SOAS

“The STAREBEI programme is a unique experience that allows young researchers like me to gain professional experience at an internationally renowned place like the EIB, working with experts, while applying academic rigour through the collaboration with a university affiliate. I am grateful to have been given the opportunity to work on issues of high policy relevance that led to publications in top journals and opened the door to more opportunities thereafter.”

Matthieu Segol

Université de Paris 1 Panthéon-Sorbonne

“I benefited from the STAREBEI programme during the last year of my PhD. I collaborated with two senior EIB researchers on an empirical project that turned out to be the last chapter of my dissertation. This collaboration, along with the scope and flexibility of the programme, make this grant a perfectly suited instrument for a young researcher willing to work on topics related to investment in Europe.”

EIBURS

RESEARCH GRANTS

31 EIBURS signed
with **26 universities**
in **9 countries**

An EIBURS (EIB University Research Sponsorship) is a research grant of up to EUR 100 000 a year, for a period of three years, to support EU universities and research centres focusing on topics decided by the EIB Group according to its interest and operational needs. Calls for application are published in the EU Official Journal. Universities cannot propose topics.

CAPSTONES

More than **100** students so far have benefited from **29** capstones with **three** universities in **three** countries

A capstone is a student consultancy project: a team of four to six Masters' students works under the supervision of the EIB Group staff who has proposed the topic. Projects have a resolutely operational approach and enable students to undertake a real-life consulting project on a topic relevant to the EIB Group. At the same time, they allow EIB Group staff to carry out useful and often directly applicable operational research.

EIB SUMMER SCHOOL

Every year, selected students from all over the EU come to Luxembourg to attend the EIB Summer School.

This 10-day programme is designed for up to 70 graduate students to learn about the core activities and responsibilities of the EIB Group. It is organised in June/July in Luxembourg. All lecturers are EIB Group staff members who offer first-hand insights about the world's largest multilateral lender and issuer that cannot be found in academic textbooks.

INSPIRATIONAL:

“Such a great experience! I had the opportunity to spend 10 amazing days with people from so many different countries (lecturers as well as students) who have been all so engaged and energetic in what they do.”

EDUCATIONAL:

“I feel it describes different aspects that could sum up the experience academically, socially and from a peer-to-peer knowledge sharing and general network building viewpoint.”

COMPREHENSIVE:

“It was a time full of things to do - the programme was filled with quality speakers, but also many excellent extracurricular activities. Time was filled with meaningful events, and that felt good.”

The EIB Summer School offers a practical approach to multidisciplinary problems with lectures on the EIB Group’s missions and operations, tutorials and breakout sessions covering legal, financial, policy and sustainability related topics. Staff members share their insider’s view, teaching participants what it means to be part of the EIB Group. The programme aims to foster long-term relationships and to create a network of those interested about the future of Europe and beyond.

The EIB Summer School is not a recruitment exercise but it offers the perfect opportunity for students who aspire to a career in the context of European integration or strategic investment to discuss with those who, through the projects they finance, influence the lives of many citizens in Europe and beyond.

COURSES ON THE EIB GROUP

To raise awareness about the EIB Group's role, missions and activities, the EIB Institute organises and coordinates courses provided by EIB Group staff for interested universities.

A typical course is structured over three or four sessions covering the EIB Group's role and strategy, financing products or project cycles. Additionally, specific courses may also be provided on project finance, microfinance and inclusive finance, infrastructure financing and management. In some cases, courses may be organised at the EIB premises.

SINCE 2016 WE HAVE ORGANISED

THANKS TO THE SUPPORT OF

70 EIB GROUP STAFF MEMBERS

On average, each year 10 courses (representing more than 50 lectures) are organised by the EIB Institute's Knowledge Programme in more than 10 EU Universities.

LIST OF EIB COURSES

UNIVERSITIES	TITLE OF LECTURE	YEAR	COUNTRY
Bocconi University (Milan)	Course of 4 lectures on the EIB Group with emphasis on long-term investments & public-private partnerships	Yearly	IT
College of Europe (Bruges)	Project and infrastructure finance – an EIB perspective	Yearly	BE
Sapienza Università di Roma	Course of 4 lectures on the EIB Group	Yearly	IT
Sciences Po Paris	Course of 12 lectures on infrastructure and project finance - an EIB perspective	Yearly	FR
University College London	Post-graduate course of 6 lectures on infrastructure investment and finance – an EIB perspective	Yearly	UK
University of Duisburg–Essen	Course of 3 lectures on the EIB with emphasis on the health care sector	Yearly	DE
University of Sofia	Course of 4 lectures on the EIB Group	Yearly	BG
University of Luxembourg	Certificate in law and regulation of inclusive finance	Yearly	LU
University of Luxembourg	Course of 10 lectures on policy, assessment and evaluation of energy projects at European level	Yearly	LU
College of Europe (Natolin)	Course of 5 lectures on the EIB Climate commitment	2021	PL
Technische Universität Dresden	Course of 4 lectures on the EIB Group	2020	DE
University of Rijeka	Course of 3 lectures on the EIB Group	2020	HR
College of Europe (Natolin)	EIB and digital infrastructures	2019	PL
LUISS Guido Carli (Rome)	Course of 2 lectures on the EIB Group	2018	IT
